6464 East Sam Houston Pkwy N, Houston, TX 77049

About

I have 5+ years of experience designing digital materials, building websites, and managing and troubleshooting software. During my most recent job, I built and redesigned 4 departmental websites for a state university and have spent extensive time practicing front-end development since then, particularly focusing on building web applications with React. I aspire to use my technological versatility, knowledge of what creates a great user experience, and adept problem-solving mindset to become a full-time Front-End/React JS Developer. My online portfolio can be viewed here: <https://david-r-frederick.github.io/portfolio/>
